VEZË SHARRI

Vezë Sharri is established as German-Macedonian investment with construction of farm intended for breeding of day-old chicks and laying hens;

- The farm Vezë Sharri has widespread own distributional network;
- Exports table eggs in the countries from the region, EU and NATO for more than 10 years;
- Vezë Sharri is approved for export of table eggs into the European Union and NATO forces.
- The farm operates with capacity of 120.000 laying hens and achieves annual production of 34.000.000 table eggs;
- In order to guarantee safety of products, the quality management system of Vezë Sharri is certified according to ISO 22000:2018 standard and has introduced and implements HACCP and HALAL system.

The farm Vezë Sharri has:

- 2 facilities for day-old chicks with a total capacity of 60.000 chicks;
- 4 facilities with total capacity of 120.000 laying hens;

Equipped with functional, completely digitalized and automated process for maintenance of optimal conditions for keeping and growing the chicks into laying hens for production of table eggs.

LECKER

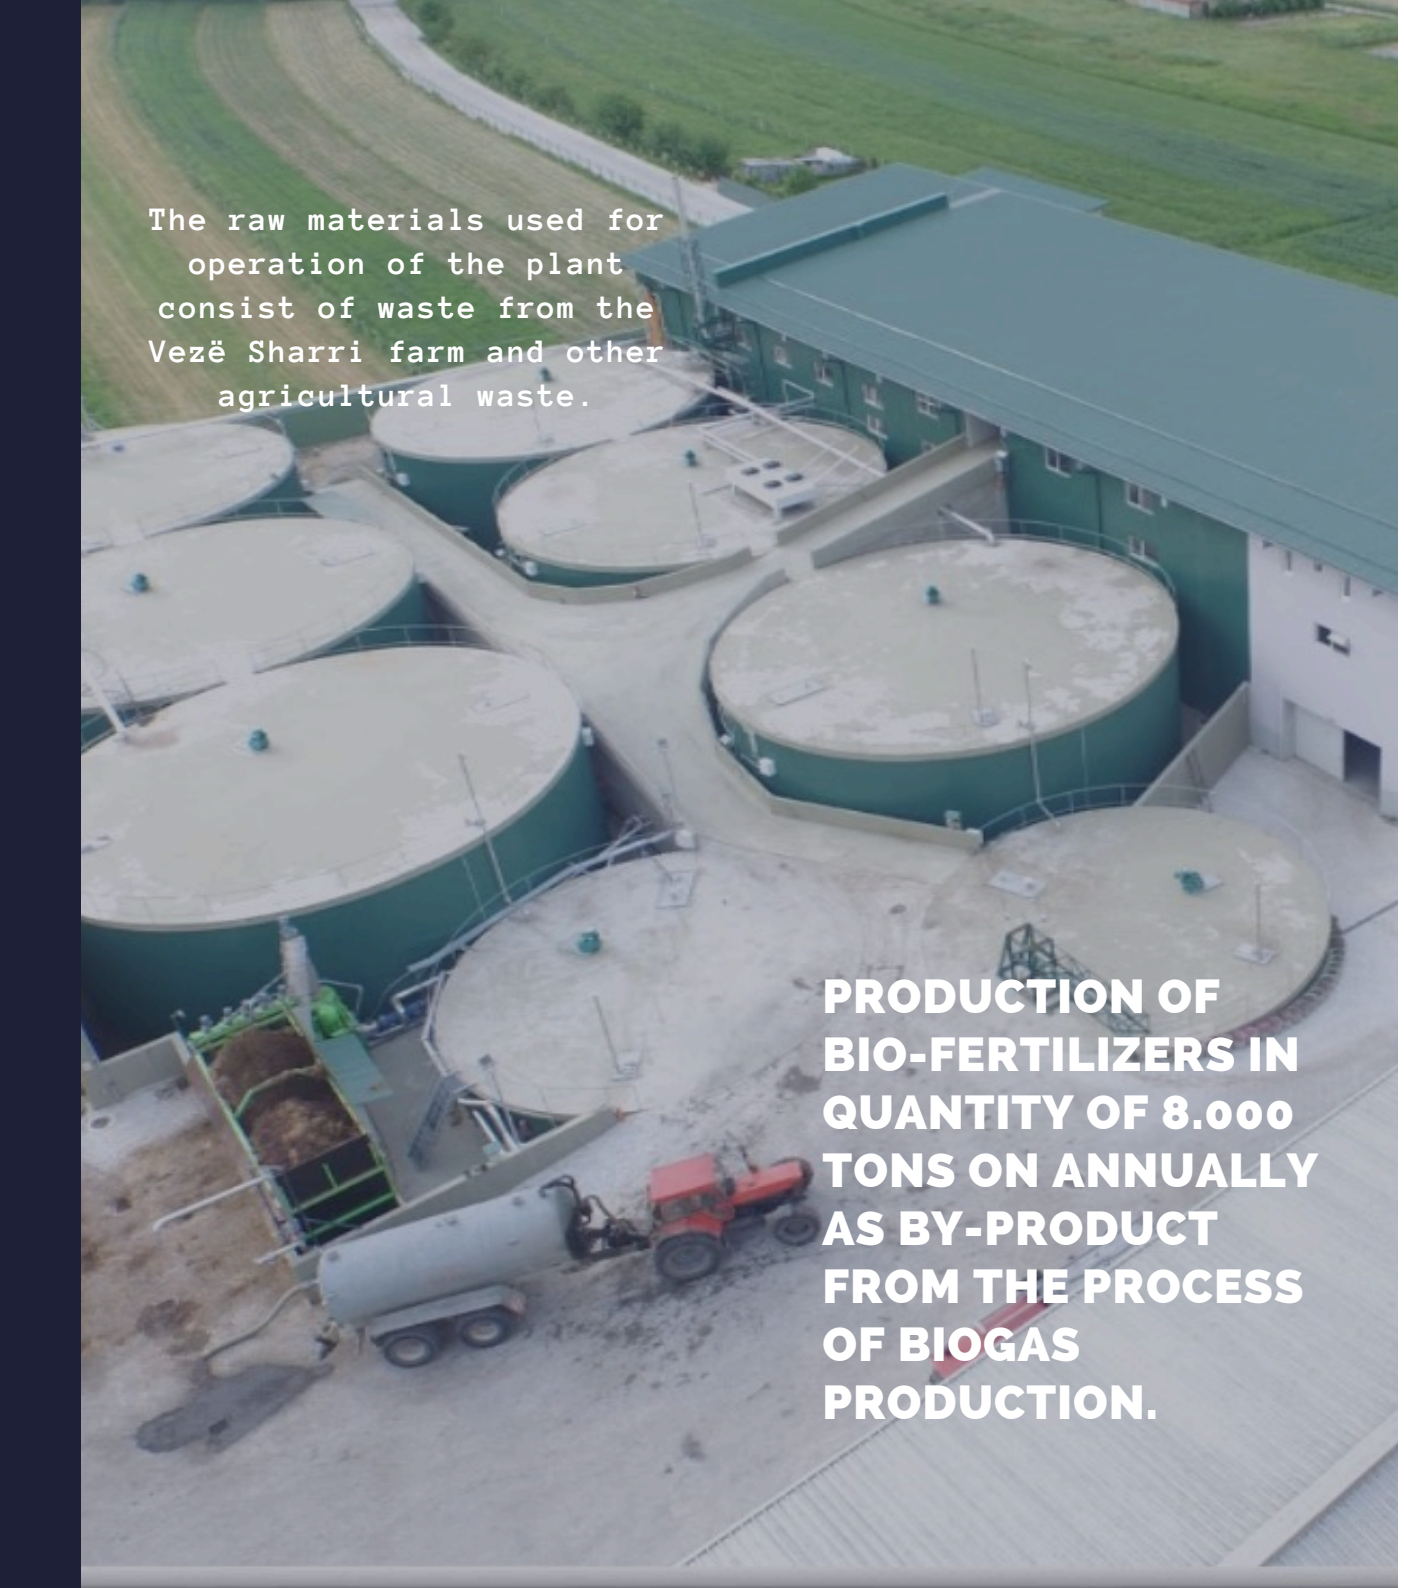

Lecker is the establishment for production of meat products, minced meat and meat preparations;

- The establishment is constructed and built according to all European and HACCP standards for production of meat products, minced meat and meat preparations. The establishment has capacity for production of 5 tons on daily basis.
- Nowadays, the establishment Lecker achieves annual production of 1000 tons products.
- In order to guarantee safety of products, the quality management system of Lecker is certified according to ISO 22000:2018 standard and has introduced and implements HACCP and HALAL system.
- Raw materials, additives, flavorings and packaging materials of reliable suppliers are used in the process of production.

The raw materials used for operation of the plant consist of waste from the Vezë Sharri farm and other agricultural waste.

**PRODUCTION OF
BIO-FERTILIZERS IN
QUANTITY OF 8.000
TONS ON ANNUALLY
AS BY-PRODUCT
FROM THE PROCESS
OF BIOGAS
PRODUCTION.**

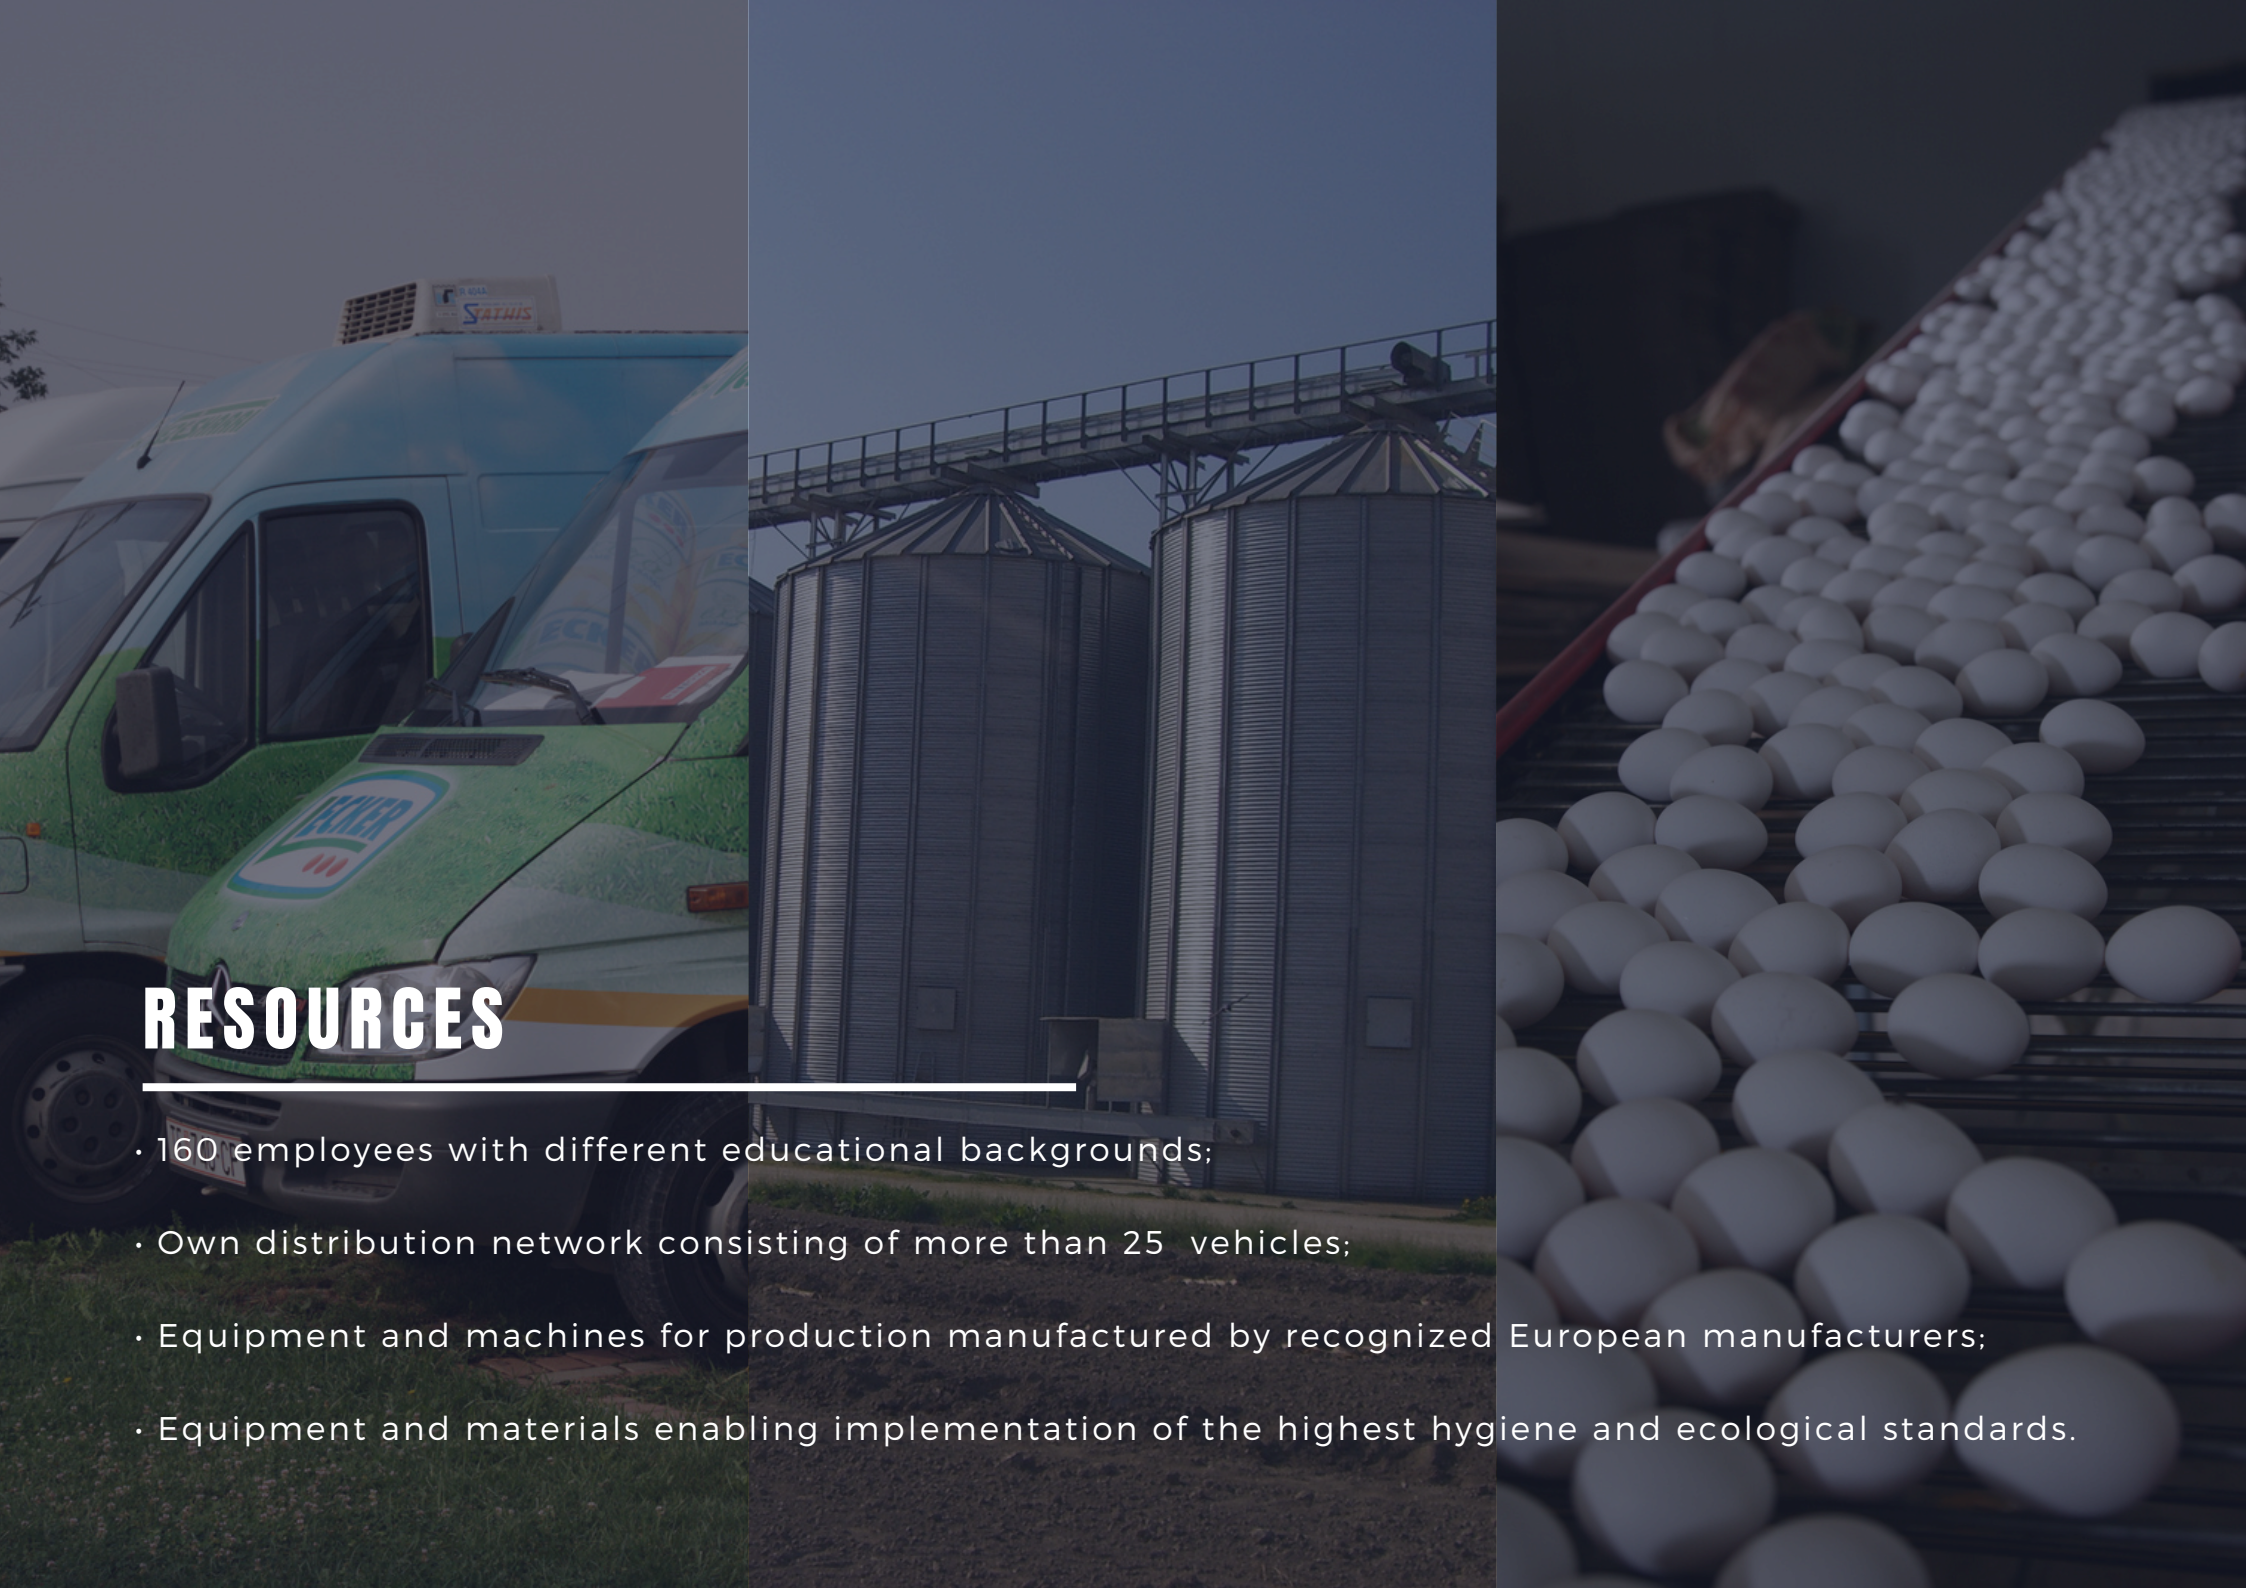

ELEKTRO SHARRI

- The plant for production of biogas and electrical power has capacity of 1 megawatt per hour, and annually produces 8.760.000 kilowatt hours.
- With Elektro Sharri, the waste is not treated as waste but as a renewable energy source.

GOLD LAND

- In order to expand the existing capacities and provide raw material for production of beef meat for Lecker and feed for Vezë Sharri, we built an agricultural complex in the village of Sllavej in Prilep in an area of 750 hectares.
- Cultivation of the agriculture land with many types of agriculture cultures intended for the needs of Vezë Sharri and Elektro Sharri.

RESOURCES

- 160 employees with different educational backgrounds;
- Own distribution network consisting of more than 25 vehicles;
- Equipment and machines for production manufactured by recognized European manufacturers;
- Equipment and materials enabling implementation of the highest hygiene and ecological standards.
